About SA SA is a Scratch modification that allows for simple programming of the Arduino open source hardware platform It provides new blocks for managing sensors and actuators connected to Arduino. There is also a sensors report board similar to Arduino With HC Bluetooth Module in Slave Mode Arduino and HC in communication mode Updated on .. Updated .. There are now newer HC s and HC s Arduino Drawing Robot Steps with Pictures I designed this project for a hour workshop for ChickTech whose goal is to introduce teenage women to STEM topics The goals for this project were Easy to miniBloq miniBloq is an open source graphical programming environment for Multiplo , Arduino , physical computing devices and robots. Quickstart SIM SIML with Arduino SIM is one of the most commonly used GSM module among hobbyists and Arduino community Even though AT command reference is available with a quick Google Arduino USB HID Keyboard MitchTech MitchTech The following two examples both use three buttons connected to the Arduino The code can easily be changed to make the buttons perform other actions, by consulting the mapping tables in the USB HID documentation.
